**Assistant Superintendent**

## **DISTRICT MISSION**

The mission of the Stratford Public Schools is to develop a community of learners in which students acquire the knowledge, skills and confidence to meet the challenges of a changing and increasingly diverse 21st century society.

## **DISTRICT CORE VALUES**

Students will acquire content knowledge, strengthen higher-order thinking, and develop character in order to address 21st century challenges.

## **BUNNELL HIGH SCHOOL BELIEFS**

We believe teachers must work collaboratively in support of student learning and to model collaboration as a social skill with students. We believe that a rigorous curriculum for all students, an acceptance of diversity, and a culture that actively welcomes all learners will contribute to a more knowledgeable community and society. We believe in the value of a strong education as a means of preparing students for work and life in the remainder of the 21st century.

## **STRATFORD HIGH SCHOOL BELIEFS**

- a safe, positive school climate that embraces diversity is essential to ensure respect and opportunity for each individual
- students should understand the world beyond their community in order to contribute to a global society
- parents and students must share responsibility and work in partnership with the school in order to improve academic performance and to develop lifelong learners
- students should use technology effectively to acquire, process, and deliver information

## **BUNNELL HIGH SCHOOL and STRATFORD HIGH SCHOOL**

### **LEARNING EXPECTATIONS**

All students will...

- use real-world digital and other research tools to access, evaluate and effectively apply information appropriate for authentic tasks. (Academic)
- work independently and collaboratively to solve problems and accomplish goals. (Civic-Social)
- communicate information clearly and effectively using a variety of tools/media in varied contexts for a variety of purposes. (Academic)
- demonstrate innovation, flexibility and adaptability in thinking patterns, work habits and working/learning conditions. (Academic)
- effectively apply the analysis, synthesis and evaluation processes that enable productive problem solving. (Academic)
- value and demonstrate personal responsibility, character, cultural understanding and ethical behavior. (Civic-Social)
- show competence in all core academic subjects and other fields of interest, including the ability to clearly and effectively communicate content information in multiple formats. (Academic)

### **Stratford Information Literacy and Technology Standards**

#### **Standard 1: Information Strategies**

Students determine their need for information and apply strategies to select, locate, and access information resources.

*Essential Understanding:*

Intelligent decision-making is based on recognizing the need and applying appropriate strategies for accessing information.

#### **Standard 2: Information Use**

Students evaluate, analyze, and synthesize information and data to solve problems, conduct research, and pursue personal interests.

*Essential Understanding:*

All information is not equal.

#### **Standard 3: Information and Technology Application**

Students use appropriate technologies to create written, visual, oral and multimedia products that communicate ideas and information.

*Essential Understanding:*

The effective communication of ideas and information is influenced by the use of appropriate formats.

#### **Standard 4: Literacy and Literary Appreciation**

Students extract meaning from fiction and non-fiction resources in a variety of formats. They demonstrate an enjoyment of reading, including an appreciation of literature and other creative expressions.

*Essential Understanding:*

Reading provides a variety of benefits and advantages.

#### **Standard 5: Personal Management**

Students display evidence of ethical, legal, and social responsibility in regard to information resources and project and self-management.

*Essential Understanding:*

Successful learning requires self-evaluation and discipline

#### **21<sup>st</sup> Century Skills**

1. Use real-world digital and other research tools to access, evaluate, and effectively apply information appropriate for authentic tasks.
2. Work independently and collaboratively to solve problems and accomplish goals.
3. Communicate information clearly and effectively using a variety of tools/media in varied contexts for a variety of purposes.
4. Demonstrate innovation, flexibility, and adaptability in thinking patterns, work habits, and working/learning conditions.
5. Effectively apply the analysis, synthesis, and evaluative processes that enable productive problem solving.
6. Value and demonstrate personal responsibility, character, cultural understanding, and ethical behavior.

## **Stratford Public Schools Standards for Science**

“What an exiting senior should be able to do in science.”

#### **Inquiry**

1. Demonstrate an understanding and apply basic scientific concepts, principles and theories in biology, chemistry, physics and earth/space sciences relative to the science program completed by the student.
2. Identify and solve problems through scientific investigation, including: identification of the problem, student design of experiments, collection of relevant evidence or data, use of logical reasoning, appropriately analyzing quantitative and qualitative data from experiments, drawing conclusions and identifying the validity of an experiment.
3. Demonstrate various scientific inquiry skills including: formulating predictions, differentiating between observations and inferences, making generalizations from observations, relating an effect to its cause, identifying patterns or relationships, distinguishing between quantitative and qualitative observations, comparing, sorting and/or classifying objects or events.

4. Select and use appropriate technology, laboratory equipment and materials, including sensing devices to measure, calculate, organize and communicate data.
5. Demonstrate the ability to work independently and collaboratively in an organized fashion to complete a task.

### **Communication**

6. Demonstrate the abilities associated with accurate and effective communication. These include writing, following written procedures, summarizing data, using language appropriately, developing diagrams and charts, explaining statistical analysis, constructing a reasoned argument, and responding to critical comments.
7. Demonstrate the ability to create and/or interpret scientific information provided in graphs, tables, charts and illustrations.

### **STS – Science, Technology & Society**

8. Distinguish between the role of science striving to understand the natural world and technology seeking solutions to human problems.
9. Analyze the possibilities and limits of science and technology in order to make and defend decisions about societal issues.

### **Safety In The Science Laboratory**

Students and teachers must be aware of the potential for safety problems in the science classrooms and laboratories. Schools should review available safety resources and develop safety training for their teachers and students as well as safety rules for the classroom.

Teachers must choose safe labs that cover important concepts. Thought must be given to the chemicals purchased by schools. Which chemicals are the safest for the proposed labs, how much is needed, where will the chemicals be stored and in what arrangement? Are the storage areas locked and well ventilated?

### **General Lab Safety Recommendations**

1. Always perform an experiment or demonstration prior to allowing students to replicate the activity. Look for possible hazards. Alert students to potential dangers.

2. Safety instructions should be given orally and be posted each time an experiment is begun.
3. Constant surveillance and supervision of student activities are essential.
4. Never eat or drink in the laboratory or from laboratory equipment. Keep personal items off the lab tables.
5. Never use mouth suction in filling pipettes with chemical reagents. Use a suction bulb.

### **General Science Safety Checklist**

The following is a suggested checklist of safety concerns in K-12 science laboratories.

1. Appropriate protective equipment for the science laboratory
2. Enforcement of safety procedures
3. All students and teachers know the location of all protective equipment
4. All students read and sign a lab safety contract.
5. Sufficient, accessible lab stations per number of students in each laboratory
6. All students must wear proper safety goggles whenever chemicals, glassware, or heat are used

No food products should be consumed by staff or students  
as part of a lesson, unit or related course work.

## **Stratford Public Schools Unit Plan for High School Science Environmental Science Unit # 1**

<b>Unit 1: Introduction to Environmental Science</b>	<b>Est. # of Weeks: 3 weeks</b>
<b>Synopsis:</b> This unit will describe the field of environmental science and discuss students' personal impact on the environment by means of an ecological footprint.	
<b>STUDENT LEARNING GOALS</b>	
<p><b>Content-Specific Powered Standards</b> <i>CT Frameworks Core Science Standards for High School Science</i></p> <p><b>9.9</b> - Some materials can be recycled, but others accumulate in the environment and may affect the balance of the Earth systems.</p> <p><b>10.6</b>- Living organisms have the capability of producing populations of unlimited size, but the environment can support only a limited number of individuals from each species.</p>	<p><b><u>Interdisciplinary Standards (Technology Integration)</u></b></p> <p><b>Standard 1: Information Strategies</b> Students determine their need for information and apply strategies to select, locate, and access information resources.</p> <p><b>Standard 2: Information Use</b> Students evaluate, analyze, and synthesize information and data to solve problems, conduct research, and pursue personal interests.</p> <p><b>Standard 5: Personal Management</b> Students display evidence of ethical, legal, and social responsibility in regard to information resources and project and self-management.</p>

<p><i>CT Frameworks Core Science Standards for High School Science</i></p> <p><b>Ecology</b>-Stability in an ecosystem is a balance between competing effects.</p>	<p>-----</p> <p><b>Key Vocabulary</b></p> <p>Environmental science Ecology Agriculture Natural resource Pollution Biodiversity Ecological footprint Sustainability</p>	
<p><b>21<sup>st</sup> Century Skills</b></p> <p><b>1. **Unit 5: Land Use - Management / Waste and Recycling**

Est. # of Weeks: 2 weeks

**Synopsis:** Land use management development and land conservation greatly impact the quality of life for all members of a community. As landfill options decrease communities and cities need to address the issues of waste management and recycling of materials.

**STUDENT LEARNING GOALS**

**Content-Specific Powered Standards**

Land management and conservation greatly impact the quality of life in rural suburban and urban environments.

The use of resources by human populations may affect the quality of the environment .

Some materials can be recycled, but others accumulate in the environment and may affect the balance of the Earth systems

**Interdisciplinary Standards (Technology Integration)**

**Standard 1: Information Strategies**

Students determine their need for information and apply strategies to select, locate, and access information resources.

**Standard 2: Information Use**

Students evaluate, analyze, and synthesize information and data to solve problems, conduct research, and pursue personal interests.

**Standard 3: Information and Technology Application**

Students use appropriate technologies to create written, visual, oral and

**Environmental Science Unit # 7**

<b>Unit 7: Air Quality</b> <span style="float: right;"><b>Est. # of Weeks: 2 weeks</b></span>	
<b>Synopsis:</b> There are different kinds of pollution that affect air quality. Air pollution is produced in different ways and can be reduced. Air pollution has short and long term health effects.	
<b>STUDENT LEARNING GOALS</b>	
<b>Content-Specific Powered Standards</b>  <i>CT Frameworks Core Science Standards for High School Science</i> <b>9.8</b> - The use of resources by human populations may affect the quality of the environment.  <i>CT Frameworks Enrichment Content Standards for High School Science</i> <b>Structure and Composition of</b>	<b>Interdisciplinary Standards (Technology Integration)</b> <b>Standard 1: Information Strategies</b> Students determine their need for information and apply strategies to select, locate, and access information resources.  <b>Standard 2: Information Use</b> Students evaluate, analyze, and synthesize information and data to solve problems, conduct research, and pursue personal interests.  <b>Standard 3: Information and Technology Application</b> Students use appropriate technologies to create written, visual, oral and

<p><b>the Atmosphere-</b> Life has changed Earth's atmosphere, and changes in the atmosphere affect conditions for life.</p>	<p>multimedia products that communicate ideas and information.</p> <p><b>Standard 5: Personal Management</b></p> <p>Students display evidence of ethical, legal, and social responsibility in regard to information resources and project and self-management.</p>	
<p><b>21<sup>st</sup> Century Skills</b></p> <ol style="list-style-type: none"> <li>1. Use real-world digital and other research tools to access, evaluate, and effectively apply information appropriate for authentic tasks.</li> <li>2. Work independently and collaboratively to solve problems and accomplish goals.</li> <li>3. Communicate information clearly and effectively using a variety of tools/media in varied contexts for a variety of purposes.</li> <li>4. Demonstrate innovation, flexibility, and adaptability in thinking patterns, work habits, and working/learning conditions.</li> <li>5. Effectively apply the analysis, synthesis, and evaluative processes that enable productive problem solving.</li> <li>6. Value and demonstrate personal responsibility, character, cultural understanding, and ethical behavior.</li> </ol>	<p>-----</p> <p><b>Key Vocabulary</b></p> <p>Air pollution  Primary pollutant  Secondary pollutant  Carbon monoxide  Nitrogen oxides  Sulfur dioxide  Volatile organic compounds (VOC's)  Particulate matter  Smog  Acid precipitation  pH  Acid shock</p>	
<p><b>Enduring Understandings</b></p> <ul style="list-style-type: none"> <li>• Emission of combustion by-products, such as SO<sub>2</sub>, CO<sub>2</sub> and NO<sub>x</sub> by industries and vehicles is a major source of air pollution.</li> <li>• The atmosphere has specific thermal structure and chemical composition.</li> <li>• The ozone layer in the upper atmosphere absorbs ultraviolet radiation. This layer varies both naturally and in response to human activities.</li> </ul>	<p><b>Essential Questions</b></p> <p>What is air pollution? Where does air pollution come from? How can air pollution harm me? What do I do to contribute to the problem? How can I help?</p>	
<p><b>Learning Objectives / Grade Level Expectations</b></p> <p><i>Students will:</i></p> <ul style="list-style-type: none"> <li>• Explain how the release of sulfur dioxide (SO<sub>2</sub>) into the atmosphere can form acid rain, and how acid rain affects water sources, organisms and human-made structures.</li> <li>• Name five primary air pollutants and give sources for each.</li> <li>• Describe the way in which smog forms.</li> <li>• Explain the causes of acid precipitation.</li> <li>• Explain how acid precipitation affects humans, plants, soils, &amp; aquatic ecosystems.</li> </ul>

<p><b>LEARNING PLAN COMPONENTS</b></p>		

**Stratford Public Schools**  
***Unit Plan for High School Science***  
**Environmental Science Unit # 8**

<b>Unit 8: Climate Change</b>		<b>Est. # of Weeks: 2 weeks</b>
<b>Synopsis:</b> Human activities may be causing climate change. Two issues are the hole in the ozone layer and global warming, the rise in average global temperature.		
<b>STUDENT LEARNING GOALS</b>		
<b>Content-Specific Powered Standards</b> <i>CT Frameworks Core Science Standards for High School Science</i> <b>9.7</b> - Elements on Earth move among reservoirs in the solid earth, oceans, atmosphere and organisms as part of biogeochemical cycles. <b>9.8</b> - The use of resources by human populations may affect the quality of the environment.	<b><u>Interdisciplinary Standards (Technology Integration)</u></b> <b>Standard 1: Information Strategies</b> Students determine their need for information and apply strategies to select, locate, and access information resources. <b>Standard 2: Information Use</b> Students evaluate, analyze, and synthesize information and data to solve problems, conduct research, and pursue personal interests. <b>Standard 3: Information and Technology Application</b>	

<p><i>CT Frameworks Enrichment Content Standards for High School Science</i></p> <p><b>Energy in the Earth System</b></p> <ul style="list-style-type: none"> <li>• Energy enters the Earth system primarily as solar radiation and eventually escapes as heat.</li> <li>• Climate is the long-term average of a region's weather and depends on many factors.</li> </ul>	<p>Students use appropriate technologies to create written, visual, oral and multimedia products that communicate ideas and information.</p> <p><b>Standard 4: Literacy and Literary Appreciation</b> Students extract meaning from fiction and non-fiction resources in a variety of formats. They demonstrate an enjoyment of reading, including an appreciation of literature and other creative expressions.</p> <p><b>Standard 5: Personal Management</b> Students display evidence of ethical, legal, and social responsibility in regard to information resources and project and self-management.</p>
<p><b>21<sup>st</sup> Century Skills</b></p> <ol style="list-style-type: none"> <li>1. Use real-world digital and other research tools to access, evaluate, and effectively apply information appropriate for authentic tasks.</li> <li>2. Work independently and collaboratively to solve problems and accomplish goals.</li> <li>3. Communicate information clearly and effectively using a variety of tools/media in varied contexts for a variety of purposes.</li> <li>4. Demonstrate innovation, flexibility, and adaptability in thinking patterns, work habits, and working/learning conditions.</li> <li>5. Effectively apply the analysis, synthesis, and evaluative processes that enable productive problem solving.</li> <li>6. Value and demonstrate personal responsibility, character, cultural understanding, and ethical behavior.</li> </ol>	<hr style="border-top: 1px dashed black;"/> <p><b>Key Vocabulary</b></p>
<p><b>Enduring Understandings</b></p> <ul style="list-style-type: none"> <li>• Elements on Earth exist in essentially fixed amounts and are located in various chemical reservoirs.</li> <li>• The cyclical movement of matter between reservoirs is driven by the Earth's internal and external sources of energy.</li> <li>• The sun is a major source of energy for Earth and other planets.</li> <li>• Some of the solar radiation is reflected back into the atmosphere and some is absorbed by matter and photosynthetic processes.</li> <li>• Different atmospheric gases absorb the Earth's thermal radiation.</li> <li>• The greenhouse effect may cause climatic changes.</li> <li>• Earth's climate has changed over time, corresponding to changes in Earth's geography, atmospheric composition and other factors, such as solar radiation and plate movement.</li> <li>• Emission of combustion by-products, such as SO<sub>2</sub>, CO<sub>2</sub> and NO<sub>x</sub> by industries and vehicles is a major source of air pollution.</li> </ul>	<p><b>Essential Questions</b></p>

<b>Learning Objectives / Grade Level Expectations</b>	
<i>Students will:</i>	
<ul style="list-style-type: none"> <li>• Explain how chemical and physical processes cause carbon to cycle through the major earth reservoirs.</li> <li>• Explain how the accumulation of carbon dioxide (CO<sub>2</sub>) in the atmosphere increases Earth's "greenhouse" effect and may cause climate changes.</li> </ul>	
<b>ASSESSMENT PLAN</b>	
<b>Summative Assessment(s)/Performance Based Assessments including 21<sup>st</sup> Century Learning</b>	<b>Formative and Diagnostic Assessment(s)</b>
	Homework Quizzes- Climate & Climate Change, Ozone Shield, Global Warming Climate Change Unit Test
