

Franklin K-6 Math News

Hi Franklin Families!

This year has been unlike any other, and we have been working through very challenging times. I just want to say, that on behalf of myself and the Math Tutors here at Franklin, we appreciate all your support in helping your students this year with Math! If you have any questions or concerns, you can always reach out!

Franklin Online Math Sites

We use two main Math programs to help support our Math curriculum. Those programs are iReady and ST Math.

iReady is part of our Ready Mathematics program and uses online tutorials and games to help students understand important math skills and concepts. Students log in through [clever.com](https://www.clever.com) and then select the iReady cube icon.

DID YOU KNOW....

John Urschel excelled in both mathematics and playing football at Penn State University. Urschel was drafted from Penn State into the NFL by the Baltimore Ravens, where he played his entire NFL career before retiring at age 26 to further pursue mathematics.

He is currently working towards his Ph.D. in mathematics from MIT where some of his mathematical fields of interest include graph theory, numerical linear algebra, and machine learning.

Our other program is ST Math. We've been using ST math for 3 years now, and the students enjoy solving wordless math problems to help Jiji cross the screen. ST Math can be accessed using [playstmath.com](https://www.playstmath.com)
